

Mix and Match

Here are photographs of Nobel Prize winners; a bit about them; and their names. They're all mixed up. Write the correct letter next to the matching descriptions and names.

A

The first Australian woman to win a Nobel Prize, this self described "lab rat" has made huge contributions to how we understand the way that cells grow and replicate. She shared her prize with two other researchers at the American lab where they worked.

Malala Yousafzai

B

Born in Albania, this 1979 Peace Prize winner moved to Ireland and then India, where she lived for the rest of her life, helping people who were suffering. She established the Missionaries of Charity, where thousands of nuns serve the poorest of the poor.

Marie Curie

C

This American novelist won the 1993 Nobel Prize for Literature, and was the first black woman to win any Nobel Prize. Best known for her *Beloved* trilogy of novels, she also wrote lyrics for songs, a children's book, and was a university professor.

Mother Mary Teresa
Bojaxhiu

D

The youngest person to ever win a Nobel Prize, this Pakistani woman shared her prize with an Indian man named Kailash Satyarthi. Both campaigned for the right of all children to education. She is also known for her activism for women's rights.

Elizabeth Blackburn

E

The first woman to win, the only woman to win twice, and the only person to win in two separate fields of science. Her pioneering research was on radioactivity, and she discovered two radioactive elements, radium and plutonium. She gave away her prize money.

Toni Morrison
