

Shake, Rattle, and Roll!

1. How are tectonic plates related to earthquakes and volcanoes?

2. What are some ways in which volcanoes and earthquakes are different?

3. What is the Ring of Fire? Include as much detail as you can remember.

4. People who live in earthquake-prone areas keep an emergency kit that has enough supplies to last their family for at least three days. What do you think should be included in a kit like that? Think about food, clothes, toiletries, important documents...

5. Have you ever felt an earthquake, or seen a volcano? If yes, what was it like? If no, what questions would you have for someone who had?
