

Great Barrier Reef

1. Design a brochure for the Great Barrier Reef using as much detail from the podcast as you can. It must do two things:
 - Attract tourists
 - Teach tourists how to be responsible reef visitors

2. This is a photograph of coral spawning, or reproducing, at the Great Barrier Reef. What do you remember about this once-per-year event?

3. Plants and animals have a lot in common, and some important differences. Sort the following into their correct categories, then do some research of your own to add more information.

grow

make their own food
through photosynthesis

need to find food

have cells with DNA

will eventually die

can move around

are alive

stay mostly in one spot

PLANTS ONLY

ANIMALS ONLY

PLANTS & ANIMALS
