Sugar!

1. Why is sugar sometimes used to treat deep cuts? Tick all that are true.

- It can help fight infection by sucking moisture out of the wound.
- Microbe-eating creatures are attracted by the sugar.
- Moisture is replaced by the sugar.
- It takes the injured person's mind off the pain.
- Bacteria needs moisture to grow.
- It works better than antibiotics at treating infection.

2. How would you feel if someone wanted to pour sugar onto your cut? Explain.

3. What do you think is better, ice cream or cake? Give three reasons for your choice.
