

**CYCLONES,
HURRICANES AND
TYPHOONS**

Name: _____ Date: _____

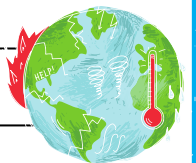

It's Wet and Windy!

1. What conditions are necessary for cyclones, hurricanes, and typhoons to form? Draw a labelled diagram to illustrate your answer.

2. Explain the factors that are contributing to us hearing more about these tropical storms lately.

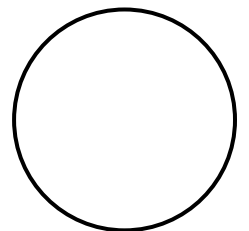

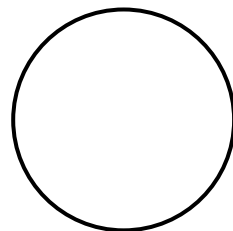

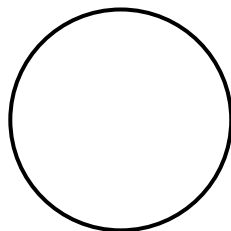

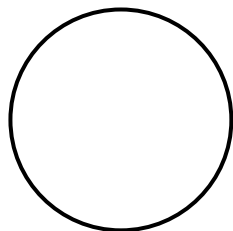

3. There are a number of things we can do to prepare for a cyclone. Draw pictures and write an instruction to help people remember what to do. We've done the first one first one for you.

Trim tress
with branches
that overhang
your house.

**CYCLONES,
HURRICANES AND
TYPHOONS**

4. Even though emergency services consistently warn people that driving through flood waters is extremely dangerous, some people continue to run the risk and get into serious difficulties. Why do you think some people don't heed these warnings?

5. Talk with a friend and discuss what you could say to the driver if you were in a car with someone who was about to drive through flood waters.

6. Based on the information in the podcast, what can be inferred about the future trends of cyclone activities and their impact on coastal regions? What can be done to prepare as a community?

7. In the future, what might a house built in a cyclone-prone area look like? Draw a labelled picture of a cyclone-proof house. Consider how to maintain electricity, prevent damage and stop loose items from being blown away.
