Monster Math

Check out these stunning Halloween statistics. Use any of them that take your fancy to create three maths word problems on the other side of this page:

- One that you think is pretty simple for everyone in your class to solve
- One that you think is a bit of a challenge
- One that is devilishly difficult.

The average pillow case holds about 1,690 lollies.

90% of adults admit to sneaking candy out of their children's trick-or-treat bags.

One third of kids sort their candies before they start scoffing them.

Americans spend more than \$2 billion every year on Halloween candy. That equals about 40 million kilograms of chocolate and lollies.

Australians spend more than \$1.5 million on pumpkins at Halloween time.

A whole pumpkin costs between \$10 and \$15.

There are about 500 seeds in every pumpkin.

The average kid's costume in Australia costs about \$50. Adult costumes are around \$75.

Americans spend \$4.4 billion on human costumes, and \$500 million on pet costumes every year.

About 15 percent of Americans dress up their pets for Halloween.
